

HERE'S HOW SIMPLE VICAM TESTS ARE TO USE:

- Weigh sample
- Add AQUA Premix Solution, shake to mix
- Filter
- Transfer to the Afla-V
 Test Strip
- Incubate the Test Strip for 5 minutes
- Insert the Afla-V Test Strip into the Vertu Reader
- Read results

Fast, Sensitive and Solvent-Free Results:

VICAM's Afla-V AQUAHS answers one of today's toughest food safety challenges with a simple, water-based aflatoxin test that delivers precise, highly sensitive, quantitative results in just minutes while eliminating the risks and expense associated with on-site solvent use and disposal. Aflatoxin is the toxic byproduct of several mold species which are natural inhabitants of soil. Classified as a Group I carcinogen by the International Agency for Research on Cancer IARC), aflatoxin presents serious risks to human and animal health, resulting in economic losses due to animal disease and reduced production efficiency.

Afla-V AQUA^{HS} Strip Tests utilize the proven sensitivity and selectivity of VICAM's monoclonal antibodies to accurately detect and measure total aflatoxins (B_1 , B_2 , G_1 and G_2) at levels as low as 2 ppb and as high as 100 ppb. Afla-V AQUA^{HS} eliminates the need for hazardous solvents using a water-based dilution-free extraction procedure that develops in just 5 minutes. Results are displayed on the digital screen and may also be printed or transferred to Excel for storage and use as a vital quality assurance tool.

BENEFITS

Sustainable - Safe, solvent-free testing

Fast screening - Results in 5 minutes*

Simple - No special training required

Sensitive - Limits of detection as low as 2 ppb**

Convenient - Easily performed onsite or in the lab

Durable - Long shelf life

Accurate – Real-time data which can be printed or downloaded to a computer

Wide Range - 0 to 100 ppb[†]

*after extraction
**limits of detection will vary based on procedure. Refer to manual

† with dilution

This procedure has been validated for peanuts.
