PTFE Coated Chemical Resistant Vacuum Pump

Features

Good chemical resistance

The PTFE-coated diaphragm and chamber can offer good resistance to a wide range of chemical gases except strong acid and alkali.

No air pollution, maintenance free

Rocker 300C and Lafil 300C vacuum pumps are driven by diaphragm, without the need of lubricant, regular oil changes and maintenance; with no oil pollution.

Quiet and low vibration

The mechanism technique and quality vibration-proof assemblies make pumps run at the lowest noise with stable.

Thermal protection device

The motor of Rocker 300C and Lafil 300C vacuum pumps has a built-in thermal protection device to shut off the pump automatically when overheated and then resume working when the temperature cools down.

Compact and safe operation

Lafil 300C is a unique filtration unit by combining vacuum source with optional filtration ware. Its compact design saves much bench space than the traditional ones. With a fence-like platform design, it can prevent user's negligence from tipping over the waste bottle.

International certification

CE certification IP 30 protection (Rocker 300C) RoHS certification (Rocker 300C)

▶ Ono-Year Warranty

Applications

- Solvent purification
- ► Solid-Phase Extraction (SPE)
- ▶ Vacuum filtration
